

# Your Net Zero Guide

Create your own timeline to achieving Net Zero emissions by 2050.

## The Net Zero Passive House

A “passive house” is a home that is completely energy efficient. Order its features below to plan how you want your household to look in 2050.

## Your Plan

1. Each number in the passive house corresponds to a task that can bring you closer to achieving Net Zero. The biggest tasks are red.
  2. Mark which of these you already have or do.
  3. Mark the tasks you know you want to do.
  4. Then, reorder these remaining tasks into the order you want to tackle them.
- Getting a home energy assessment and talking to your electrician should always be step 0!

Task	Available discount?	Renter-friendly?	I have this	I want this	Task Order
1) Solar panels	X	X			
2) Green transportation	X	X			
3) Heat pump	X				
4) Electric appliances	X	X			
5) Insulation	X	X			

6) Sealing	X	X			
7) LED lighting	X	X			
8) Composting	X	X			
9) Low-meat diet		X			
10) Plant a tree	X				
11) Efficient faucets	X	X			
12) Rain barrel	X	X			
13) Eco-friendly lawn
